

Carburetor Choke Vacuum Break Control

Mounted on the RH side of 66-75 carburetors, they are linked to the coiled choke springs on the intake. They resembling 2 inverted pie pans, about 1" in dia. After 20-30 years, they are often damaged or rusted out, and can no longer control carb idle & fast idle speed. They are plated Yellow Di-Chromate for most, except as noted.

66-70 Holley Choke Controls

66-67 300, 350, 390 HP exc A.I.R.;
67-69 400, 435 HP center carb only
70 370 HP LT-1 exc Calif.
NOS Choke Vacuum Break

3275528 Disc

68-75 Q-Jet Choke Controls

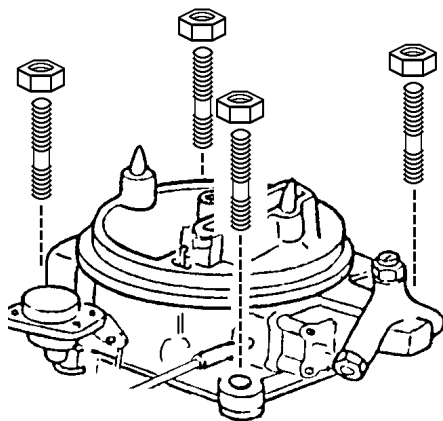

68 Q-Jet Control Nylon 3275530 Disc
69 Q-Jet Control Nylon 3275532 Disc
70-71 Q-Jet Control Nylon 3275534 Disc
72 Q-Jet Control 3275536 0.00

Holley Vacuum Secondaries

These die cast Zinc parts with Yellow Di-Chromate plating regulate the fuel supply when you "Nail it". On 3x2 models, use only on the end carbs; therefore 2 are required.
