**Individual NOS Hose Clamps see page 47**

**OEM and Repro Hose Clamps**

**Wittek Mfg.- the OEM manufacturer of the tower and many side screw clamps went bankrupt in 1993. We have run out of some of the factory tower style hose clamps, especially for 59-68 models and we now offer reproductions for those models. The 1970-1982 models are available as a reproduction and as OEM clamps. The factory Witteks are in limited supply.**

<b>Tower Clamp Facts: radiator hoses do not use tower clamps after 1969 !! Heater hoses began using Tower clamps in late 68 -- however on 68-82 air conditioned models Tower clamps are not used on all of the heater hose connections (generally those on the AC heater core itself are not tower style !!</b>
