

63-76 Fan Shroud Seals

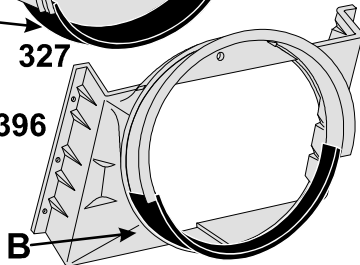

A 63-65 327 Lower Shroud Seal

Die cut authentic asymmetrical pattern of thick textured surface masticated sheet rubber. Beware symmetrical bogus pattern in replacement materials. Attaches with 5-7 staples. **Exactly** like on my own 1963. 1274201 8.00

63-65 327

65 396

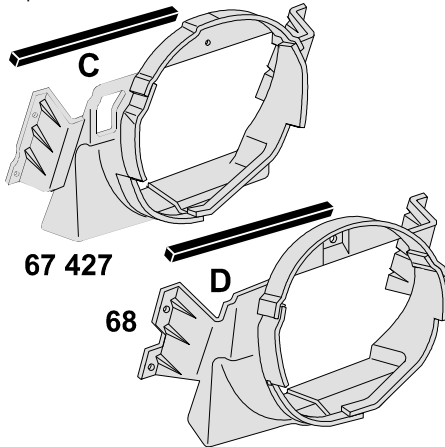

B 65 396 Lower Shroud Seal

Die cut thick textured surface sheet rubber. Attaches with 5-7 staples. 1274203 12.50

C 66-67 AC 427 Upper Shroud Seal

Die cut black sponge rubber mounts to the top rear edge of the fan shroud where it meets the top of the radiator. Install with Black weatherstrip adhesive. It's 50 cents more than others, - but the only one made from the actual GM blueprint. It's Exact. 1274205 5.00

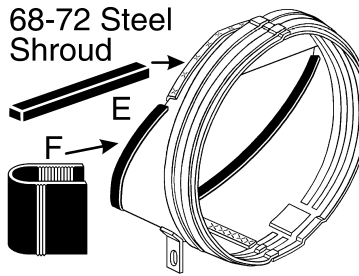

D 68 Plastic Shroud Upper Seal

Use with all Air Cond. models & all 427's with plastic fan shrouds. Die cut sponge rubber with PSA. Use Black weatherstrip adhesive to mount to the top rear edge of the fan shroud where it meets the radiator. It's 50 cents more than others, but the only one made from the actual GM blueprint. It's Exact. 1274406 5.00

E 68-72 Steel Shroud Upper Seal

Use on all models with steel fan shroud. Die cut sponge rubber with PSA. Mounts across the flat top center section of the fan shroud 1274405 5.00

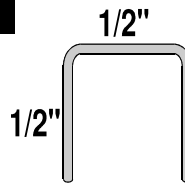

F 68-72 Steel Shroud U-Shaped Seal

Use on models with steel fan shroud. Extruded rubber seal has the authentic deep "U" shaped profile & is authentic down to the **Raised Ribs** on the surfaces, with **11 Ribs** on the inner surface & **3 Ribs** on the outer one. Mounts with 16 staples to the sharp front edge of the steel shroud. I wonder what Zip copied ?? 1274404 14.75

Staple Wire Kits

Authentic gauge wire. Cut wire 1 1/2" long & bend wire 90 degrees every 1/2" **63-65 Kit** Makes 5-7 staples 1274014 2.20 Kit

68-72 Kit Makes 16 staples 1274025 2.50 Kit

G thru L 69-Early 76 Plastic Shroud Seal 4 Piece Kits

Don't be fooled by the same prices as Zip. We had these made from the actual GM blueprints. They're exact, not a copy. Use on all models with plastic fan shrouds. All sets are die cut Black sponge rubber with PSA. Each set includes a thick narrow upper horizontal seal & thin wide lower horizontal seal. The LH & RH vertical seal are thin and narrow with the LH usually slightly shorter than the RH.

WRINKLED PSA

Beware of sponge rubber seals with **WRINKLED PSA**. If the protective peel-off paper that covers the Pressure Sensitive Adhesive is **WRINKLED** -- you have a Defective Substandard Part. These parts will not stay attached to your fan shroud or radiator support.

WRINKLED PSA allows the adhesive to dry out and pull away from the seals. Shop with confidence when purchasing **DocRebuild's** products -- we apply our own smooth PSA in our own factory. Reject those trashy Shabby Blem Products
